Residential Rehabilitation Benefit

The Trustees of the Millwrights Local 2736 Health Benefit Plan have approved the addition of a new Residential Rehabilitation Assistance Benefit. This benefit provides funding to support eligible members who are entering a recovery program within a residential rehabilitation facility. The benefit is available to Union Members in good standing, who are also covered under the hourbank plan.

The Plan will pay for residential rehabilitation treatment on the following basis:

- If you contact the EFAP program (FSEAP), a counsellor can help find a program which will be effective for you.
- Services must be provided via a licensed treatment facility. More information regarding recovery services and a list of licensed facilities in B.C. can be found here: <https://www.bccsu.ca/bc-recovery-services/>
- Payment can be paid by the Plan in advance directly to the facility. Alternatively, the member or other individual who paid the facility may be reimbursed upon successful completion of the program.
- The Plan's maximum payment is \$10,000 per member per lifetime.

For further details, or to apply for this benefit, please contact the Union or the Administrator.
